

## ENERGY POLICY

The implementation of the **Energy Management System** according to the ISO 50001:2018 standard at the **Copan Futura** and **Copan Sede** sites of **Copan Italia SpA** is the **natural continuation of the project to reduce the environmental impact** of activities, which has always been the subject of company mission.

With this document, Copan's management wishes to formalise its energy policy and at the same time **confirm the following commitments:**

- Ensure that energy policy is **appropriate to energy use and energy consumption**.
- Ensure that activities are carried out for the **continuous improvement of energy performance** and energy consumption.
- Compliance **with applicable legal and other voluntary requirements** in relation to energy use, consumption and efficiency.
- Set and periodically review **energy objectives and targets**.
- Provide the **appropriate information** and resources needed to achieve **objectives and targets**.
- Support for the **purchase of energy efficient products and services** that can have an impact on energy performance.
- Support **design activities** that take into account improvements in energy performance;
- Periodic **review and updating** of the corporate commitments in this policy.

Management is also committed to **documenting and making this document available** to all levels of the company, and to **encouraging everyone to know and implement** this policy, in order to open a dialogue between the company, employees, customers, suppliers, institutional subjects and the public, leading to **greater awareness** of issues of **efficiency, rational use of energy, reduction of energy costs, reduction of greenhouse gas emissions** and other related environmental impacts.

Management will also ensure that this policy is **available** to all levels of the company using **all communication tools** at its disposal, such as company notice boards, the intranet and the website [Copan \(copangroup.com\)](http://Copan(copangroup.com)).
